

KMARIN Techniques

KMTEC

CEO Message

We provide project management service that is customizable to the needs of our customers.

We offer high quality service through the experience and expertise of our employees.

KMARIN Techniques serves both domestic and overseas clients in the maritime / aircraft / power station / container industry.

At KMARIN Techniques, we are committed to creating value for all of our clients.

We recognize that the sustainable success of our company is closely linked to our clients' day-to-day satisfaction around doing business with us, as well as the longer-term relationship-based client loyalty.

We aim to ensure our customer satisfaction through persistent quality management.

Being at the forefront of environmental protection and sustainability, we keep a close monitor of ways in which we conserve resources and minimizing waste production.

These form the foundation from which we create value.

The executives and employees of KMARIN Techniques are determined to commit themselves to serve our valued clients as a reliable partner, by providing flexible services and high-quality products.

CEO of KMARIN Techniques
Hyun Duk HONG

History

Global Network

Service from the main offices located in Korea and China and Vietnam across its global network to various clients and partners including KUKDONG Logistics Group, energy resource companies, shipyards, logistics operators, container owner and the wider financial community.

Service Line

Maritime Service

- Crew Resource Management
- Research & Development
- Procurement

Aviation Service

- Technical Management
- Lease Management

Operation & Maintenance

- Offshore Windfarm
- Offshore Windfarm Construction
- Power Station

Intermodal Safety Service

- Repair & Cleaning for Container (Dry/Ref/Tank)
- New Production Inspection of Various Type Container

IT Service

- System integration (SI) to logistics services
- System management (SM) to logistics services

Maritime Service

In the field of Maritime Services, we deliver integrated Total Engineering Services covering the entire vessel lifecycle — from new building supervision to long-term COA shipping solutions, professional crewing and training programs, and marine supply. Our capabilities further extend to specialized consulting and new building supervision, ensuring safety, compliance, and operational excellence at every stage.

Crew Resource Management	Maritime Research & Development	Procurement
Crewing Training	Consulting & New Building Supervision	Marine Supply

MV. KMARIN DIAMOND

I Crew Resource Management

Our Crew Resource Management ensures safe and efficient vessel operations by deploying highly qualified Korean and international seafarers under a strict HSEQ policy. In addition to mandatory training, we provide continuous competency development programs during both onboarding and vacation periods to maintain operational excellence.

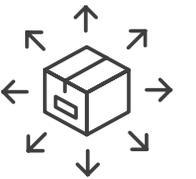

I Research & Development

Our R&D division is dedicated to advancing energy-efficient and future-ready maritime solutions. We are actively involved in the conversion of Methanol Dual-Fuel (DF) engine systems under a national project, while also conducting specialized consulting and inspection services for oil and gas tankers. Through deep industry knowledge and technical expertise, we support clients in achieving operational excellence, regulatory compliance, and sustainability in the evolving maritime energy landscape.

I Procurement

Our procurement team works in close coordination with technical departments to support efficient new building supervision and ensure timely marine supply. By applying strategic sourcing and quality-driven procurement practices, we secure critical components and services throughout the vessel lifecycle. We remain committed to cost optimization without compromising safety, compliance, or environmental responsibility.

Aviation Service

As specialists in aircraft technology, we deliver end-to-end technical solutions.

Our services encompass comprehensive inspections for aircraft and engines-including pre-purchase, annual, and midterm checks-as well as engine shop visit management and return inspections.

Our expertise extends to managing aircraft delivery and redelivery processes, End-of-Life (EOL) and transition oversight with on-site technical representation, and redelivery project coordination supported by meticulous technical records review.

We also provide strategic consulting for technical negotiations, aircraft and engine valuation, and contract advisory services.

Furthermore, we conduct in-depth audits of maintenance and parts providers to ensure operational excellence and regulatory compliance across the value chain.

Operation & Maintenance

- Offshore Windfarm
- Offshore Windfarm Construction
- Power Station

Intermodal Safety Service

In the field of container maintenance and repair (MNR), we offer comprehensive one-stop services for both DRY and reefer containers, including ISO container units. Our core competencies span cleaning, repair, inspection, survey, and storage, all operated under a fully integrated system. Backed by in-house ownership and commercial operation of ISO tank containers within our group, we bring unmatched technical expertise and field experience — setting us apart from general service providers. With strategically located service stations — including the ANGOL Industrial Complex, Busan New Port CY, and Busanjin CY — we ensure prompt, high-quality support that meets the demands of global logistics networks.

And we offer service that monitor the manufacturing and assembling of the containers

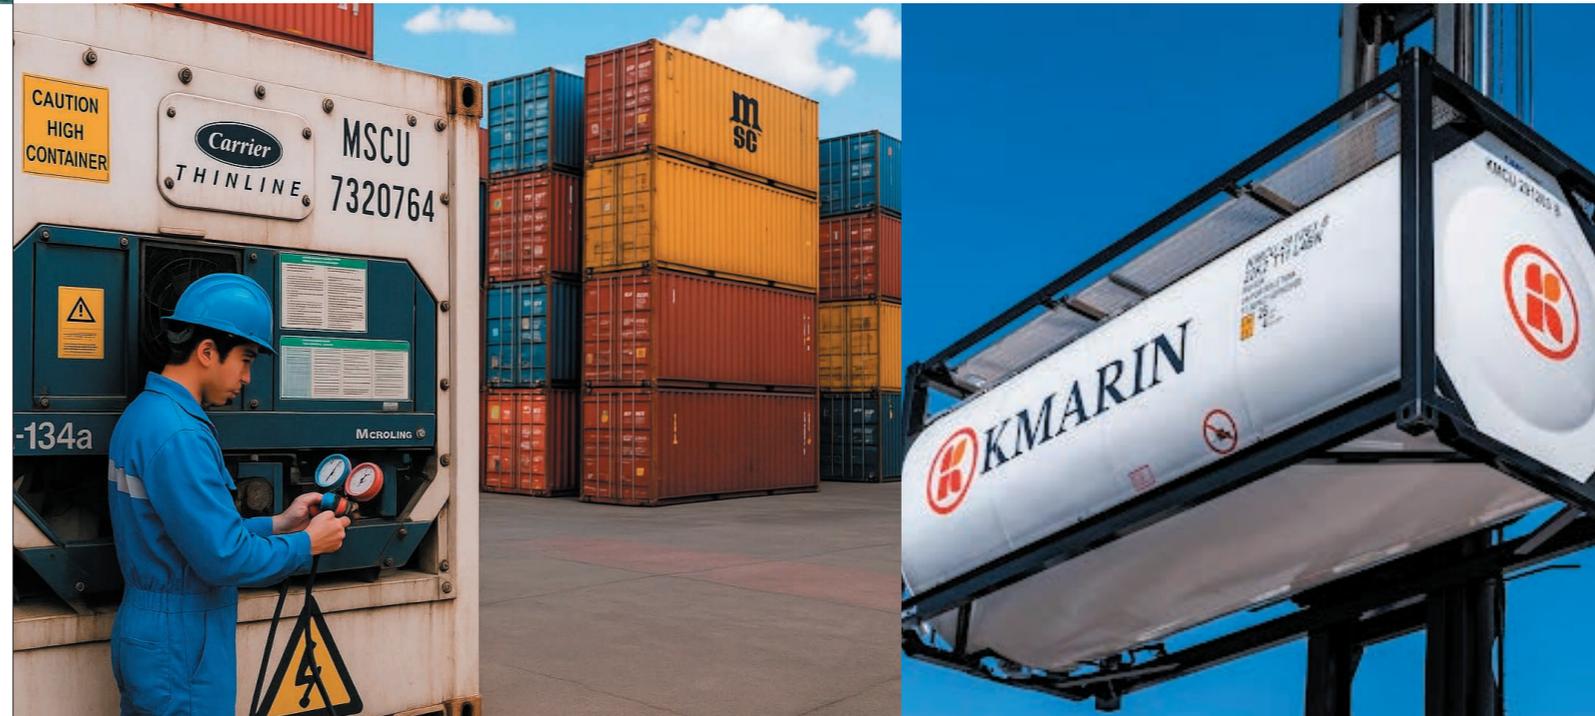

- : Preproduction audit and meeting & Design review & Major material inspection & Bench welding for tank shell inspection & Dome end inspection including welding & X-ray inspection & Steam tube fitting and welding inspection & Total assembly and welding inspection & Witness of hydro test & Pickling and passivation for tank shell & Shot blasting and painting inspection. & Insulation and cladding fitness inspection & Walkway valve fitting inspection & Marking & Leak test & Final acceptance inspection ETC.

Operation & Maintenance

We successfully completed the "JEONNAM 1 Offshore Wind Farm Monitoring Service."

- **Demonstrated Expertise**
: Over a period of one year, we demonstrated our capabilities in monitoring marine traffic.
- **Safety First**
: We achieved 100% of our HSE targets with zero safety incidents during the service period, showcasing our management philosophy of prioritizing safety above all else.

This is a significant achievement that proves our capacity as a reliable partner in the offshore wind power generation business.

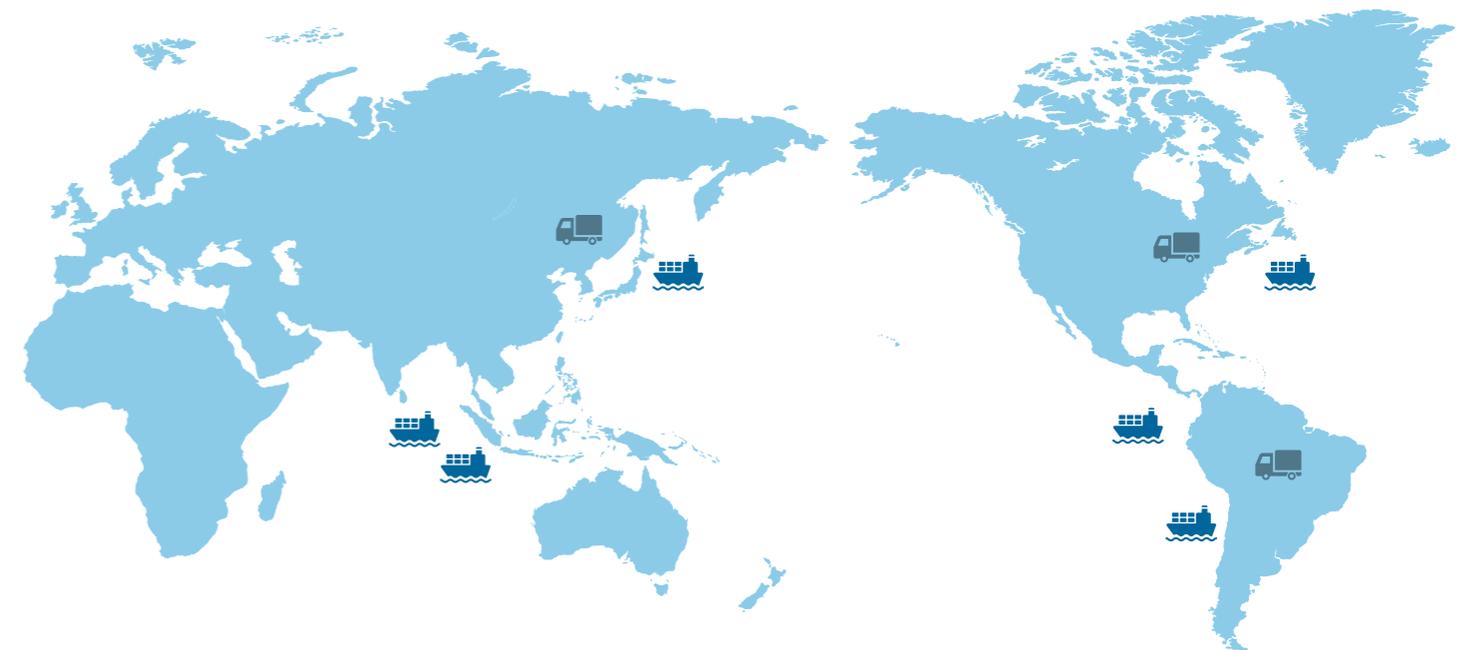

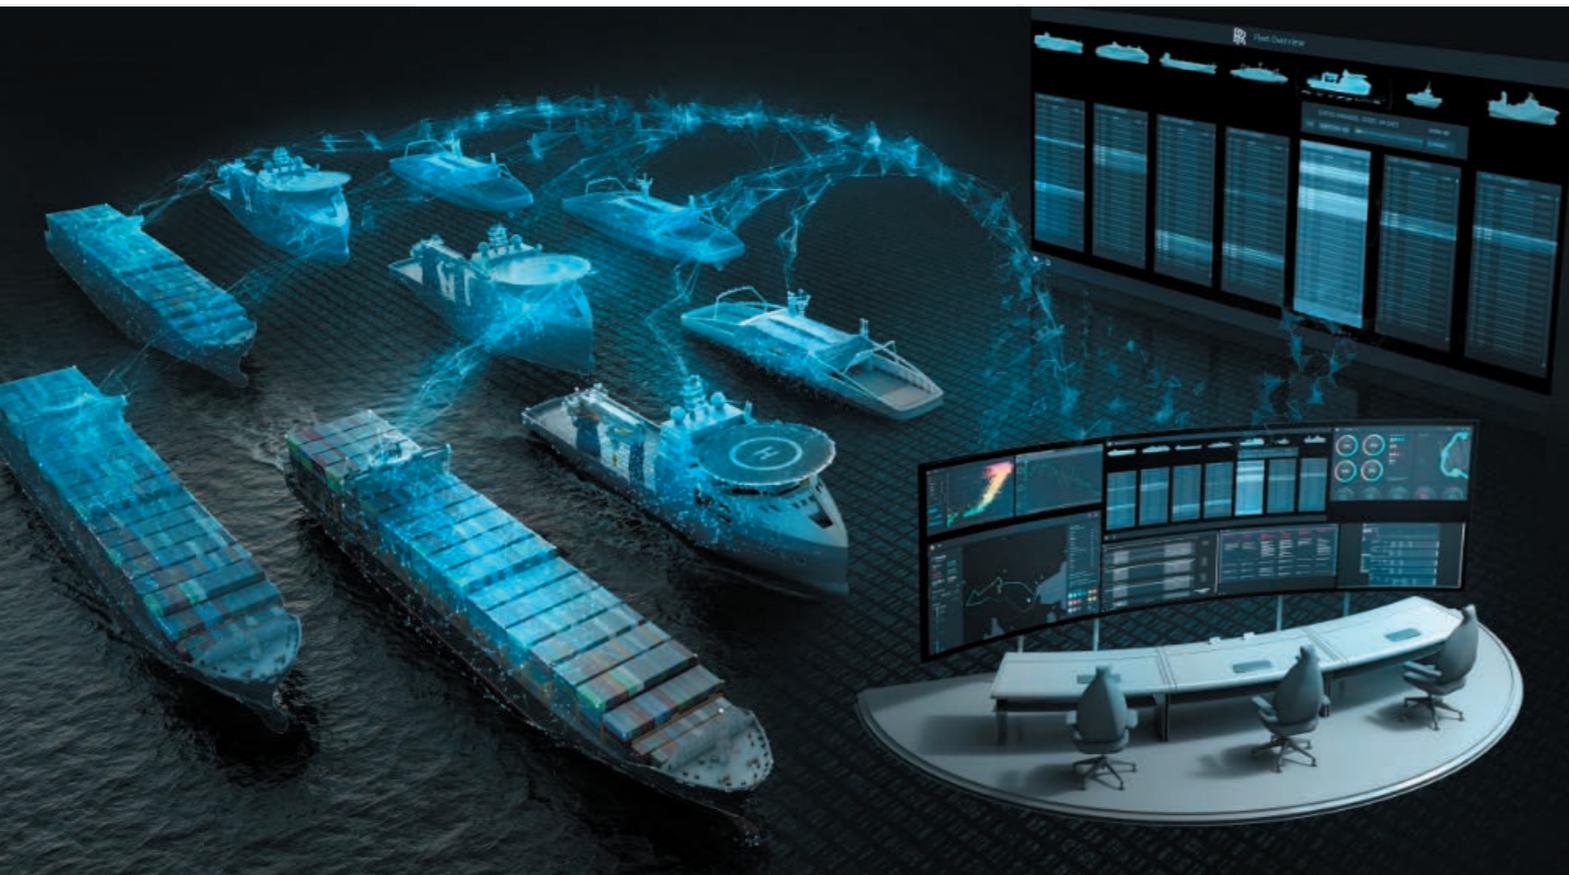

IT Service

We provide comprehensive IT services, covering the full spectrum from IT strategic planning to system operation and support.

We possess broad expertise, particularly in IT solutions for specialized industries such as ship management, aircraft inspection, and cargo transportation, in addition to SI (System Integration), SM (System Management), IT strategy consulting, network and cloud solutions, business system implementation, and 3PL/4PL logistics services.

Based on stable infrastructure operation and information security, we maximize internal operational efficiency. Simultaneously, through the adoption of new technologies and the enhancement of our IT service capabilities, we actively support the group's business expansion and global market entry.

With our extensive experience and cutting-edge digital technology, we deliver customized solutions that meet the unique needs and goals of each business. Through core strategic services that enhance digital competitiveness and create new business opportunities, we lead the growth of our clients.

Why Us?

I Skilled Experts

Our strength lies in our people — highly skilled professionals with deep industry experience and a strong commitment to operational excellence.
